

# Remlok

## Remotely Operated Medicine Cabinet

Open and close the cabinet using the  
REMLOK App

- ✓ For patients who forget that they have taken their medicines at their normal administration time and take further tablets between doses
- ✓ For patients who may want to self-harm by taking more tablets than their prescribed dose
- ✓ For methadone users who must attend the local pharmacy daily for their dose of methadone
- ✓ For patients who live in community dwellings or who co-habit and where medicine storage is a problem
- ✓ For patients who have mental health issues and live in community housing
- ✓ For patients with mental health issues who require carers to provide access to medicines in locked cupboards

The team at The Medication Support Company can provide the REMLOK cabinet as part of their current PAMAN service package being offered by Liverpool and Knowsley councils.

This allows the PAMAN team to open the REMLOK cabinet at the agreed time, monitor the removal of medicines from the cabinet, monitor the medicine administration, replacement of the medicines into the cabinet and monitor the cabinet being closed and locked.

For more details and a video about REMLOK please visit our website
